

MAG Knight™

MAGNETIC TANK BRA

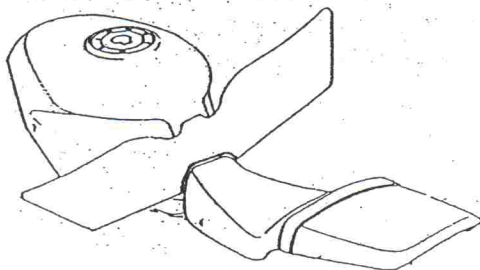

INSTALLATION INSTRUCTIONS

Before installing the **MAGNETIC TANK BRA** wipe your tank with a clean, damp chamois. Then, watch the installation video | www.mag-knight.com/tips.htm. It will provide far more information than we can possibly provide on this piece of paper. It will detail how you can achieve a "rubber glove" fit. If you do nothing else, watch the video!

STEP 1

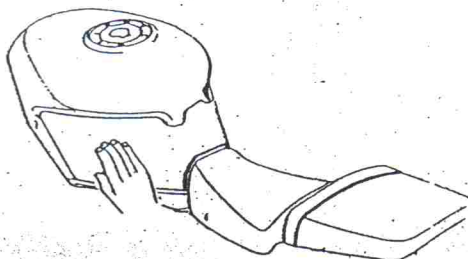

Place the **MAGNETIC TANK BRA** and your bike in the sun for a least 15 minutes and allow each to warm. (Note: For white bras, turn the back side towards the sun to heat.)

STEP 2

Align the cutout in the bra with the seat as shown.

STEP 3

Wrap each side of the **MAGNETIC TANK BRA** completely around the tank. Make sure the key features of the bra mate with the matching features on the tank. "Work out" any bubbles by firmly pushing them forward with your hand.

If the bra needs to be adjusted slightly, peel back both sides until it looks like the picture in step 2. Avoid unnecessary sliding of the **MAGNETIC TANK BRA** against tank.

MAINTENANCE OF YOUR **MAGNETIC TANK BRA**

Cleaning: Your **MAGNETIC TANK BRA** can be cleaned with the same detergent you wash your bike with. Brighten your bra using a quality vinyl protectant.

Storage: Store your **MAGNETIC TANK BRA** either on your bike or in its original shipping tray.

INSTALLATION TIPS

1. Be sure your magnetic tank bra is properly aligned. There is a chart and instructions available at www.mag-knight.com/tips.htm that gives an exact measurement from the top edge of the bra to the edge of your filler cap. The bra is molded to an actual tank here at the factory using that exact dimension. If you miss-align the bra by even 1/2", it will not fit properly.
2. Use the pieces of tape in the area shown below to attach the bra to your tank and hold it there for 24 hours. There are two or more pieces of tape that we have attached to your bra here at the factory. Attach the bra using all the previous heating and alignment instructions then press on the tape to adhere the bra to the tank. Allow it to sit this way for 24 hours or more (in the sun is even better) then remove the tape. The tape will not leave a residue on your bike or bra. This should eliminate any puckers for good.

LIMITED WARRANTY

Mag-Knight Inc. warrants this product to be free from defects for 90 days from date of original sale. Mag-Knight Inc. will replace, free of charge any part found to be defective under normal use and service within the warranty period provided that the product is installed, used and maintained in accordance with all applicable instructions and/or limitations issued by Mag-Knight Inc. and provided that the unit is returned to the factory prepaid. Mag-Knight Inc. is not responsible whatsoever for incidental or consequential damages or for products that have been altered, modified, or used in any manner not intended for the specific product. No agent or representative of Mag-Knight Inc. has authority to waive, alter or add to the printed provisions of this guarantee or to make any other express or implied warranties of fitness for a particular purpose. Mag-Knight Inc. cannot and does not assume liability for defective products not manufactured or supplied to us even though such products may be used in conjunction with our own. Mag-Knight Inc. reserves the right to redesign, alter or modify its products without incurring any liability for anyone's inventory or parts or products that may become obsolete. Mag-Knight Inc. assumes no liability for damages or charges for labor or expense in making repairs or adjustments. Components manufactured by Mag-Knight Inc. and supplied as replacement parts are warranted for a period of ninety days from the date of shipment from the factory. Mag-Knight Inc. assumes no liability for damages sustained in the adoption or use of our engineering data or services.
